troubleshooting

TELUS TV INSTRUCTIONS

Select the proper mode by pressing the "mode" button at the top left of the remote. Then press the power button to turn both the TV and cable box on. When the cable box is first turned on the Info Menu will open.

If the power light in the centre of the Telus box is green, it is on. To reset the cable box, either hold down the power button on top or on the front. If the TV shows "no video signal", it may be on the wrong input. Change the input by pressing the "source" or "input" button on the TV remote or the "input" button on the side of TV.

WiFi CONNECTION ISSUES

Most issues with WiFi can be fixed with a quick reset. Just unplug the modem, wait a few minutes and plug it back in. If the cable on the tv is working, then the WiFi is working.

BATHROOM FAN If the fan won't turn off, it may be the humidifier knob nearby. Increasing the humidifier setting will turn off the fan. It looks something like this:
